## EDITORIAL

Dr. B. DEVDAS RAI

World Blood Donor Day takes place on 14 June each year. The aim is to raise global awareness of the need for safe blood and blood products for transfusion and of the critical contribution voluntary, unpaid blood donors make to national health systems. The day also provides an opportunity to call to action to governments and national health authorities to provide adequate resources and put into place systems and infrastructures to increase the collection of blood from voluntary, non-remunerated blood donors.

Safe blood and blood products and their transfusion are a critical aspect of care and public health. They save millions of lives and improve the health and quality of life of many patients every day. The need for blood is universal, but access to blood for all those who need it is not. Blood shortages are particularly acute in developing countries.

To ensure that everyone who needs safe blood has access to it, all countries need voluntary, unpaid donors who give blood regularly. Throughout the

COVID-19 pandemic, despite limited mobility and other challenges, blood donors in many countries have continued to donate blood and plasma to patients who need transfusion. This extraordinary effort during a time of unprecedented crisis highlights the crucial role of well-organized, committed voluntary, non-remunerated blood donors in ensuring a safe and sufficient blood supply during normal and emergency times.

The history of blood donation goes far back, with the first transfusions done using poorly understood science and very early research. But it wasn't until Richard Lower was the first one to examine the science of blood donation with animals. He managed to successfully transfuse blood between two dogs with no appreciable ill effects.

And the science that surrounded the topic of blood slowly developed from that point, breaking taboos and moving from animal experimentation. From progress in transfusion technology to Karl Landsteiner discovering the ABO human blood type system to best determine donors, blood transfusions quickly became a staple in health topics and the medical field.

Following on from the success of World Health Day in the year 2000, which focused on blood donation and the safety of transfusions, ministers of health from all across the world made a unanimous declaration in May 2005, during the 58th World Health Assembly, to designate World Blood Donor Day as an annual event held on every June 14, choosing Landsteiner's birthday to commemorate it. For 2021, the World Blood Donor Day slogan will be "Give blood and keep the world beating". The

message highlights the essential contribution blood donors make to keeping the world pulsating by saving lives and improving others' health. It reinforces the global call for more people all over the world to donate blood regularly and contribute to better health.

A special focus of this year's campaign will be the role of young people in ensuring a safe blood supply. In many countries, young people have been at the forefront of activities and initiatives aimed at achieving safe blood supplies through voluntary, non-remunerated blood donations. Young people form a large sector of the population in many societies and are generally full of idealism, enthusiasm and creativity.

The specific objectives of this year's campaign are to thank blood donors in the world, create wider public awareness of the need for regular, unpaid blood donation and to promote the community values of blood donation in enhancing community solidarity and social cohesion. It also aims to encourage youth to embrace the humanitarian call to donate blood and inspire others to do the same.

World Blood Donor Day aims to raise awareness regarding the need for regular blood donations, important to keep the health industry with a stable supply, and to celebrate the hard work of medical professionals that work in the research and development for new technology and uses for donated blood, as well as medical teams who use blood on a regular basis. This day is also used to thank donors for their service and determination to save lives and make the world a better place.

# PRESIDENT'S MESSAGE

**Dr. M. VENKATACHALAPATHY**

Dear esteemed members,

First of all, I wish you a happy Doctors Day. We celebrate this day to commemorate both birth and death anniversary of Dr. Bidhan Chandra Roy who was a great physician, Freedom Fighter, Politician, Educationist, Philanthropist and able statesman,

I wish to share my experiences of Rajiv Gandhi University of Health Sciences Syndicate meeting where as President of IMA-KSB, I made use of my experience of IMA-KSB Schemes to bring New benefit schemes for students. One is a Insurance scheme where the RGUHS will bear the Health care expenses of its students with capping when they fall sick.

Second is the RGUHS students assurance scheme where tuition fees as per the Government seat quota expenses of students will be taken care of by RGUHS in the uneventful death of their earning parents.

Even though there is a Vedic chant "*Vaidyo Narayano Harih*" which means that doctors are next only to God showing how important doctors are to maintain the health of mankind, unfortunately violence on doctors goes unabated. To oppose this violence, IMA Headquarters had given a call on 18.06.2021 for All India Medical protest Day. IMA-KSB fully supported the cause and it was a success all over the state and also was noticed by many political leaders. On this Doctors Day, our own Prime Minister addressed the healthcare professionals.

Doctors Day was celebrated at IMA-KSB office in Chamarajapet, Bengaluru following covid guidelines with utmost importance and sanctity. Hon'ble Minister for Medical Education and Health and Family Welfare Dr. K. Sudhakar along with Additional Chief Secretary participated in the Function. He heard all our grievances like simplification of KPME registration

and renewal particularly of Fire compliance, help to covid martyrs and violence on doctors. All the issues were appropriately addressed by the Hon'ble

Minister and he assured of suitable remedies at the earliest.

I once again wish you all a happy Doctors Day.

**Long live IMA**

### FLAG SALUTATION

We, the members of Indian Medical Association stand here to salute our national flag.  
Its honour and glory shall be our light and strength and its course shall be our course.  
We pledge our allegiance to it and realizing our responsibilities as the accredited members of this national organization, we swear we will dedicate everything in our power to see it fly high in the comity of nations.

**Jai Hind !**

**Long Live IMA!**

## VICE PRESIDENT'S MESSAGE

**Dr. Jaspalsingh. H Tehalia**

Dear Members,

It is indeed a great pleasure and privilege to write to you as Vice-president of the most prestigious association –INDIAN MEDICAL ASSOCIATION

Yes, we the survivors of the pandemic have witnessed

**Catastrophic loss of lives and crumbling economics.....**

**Never thought before fear of survival.....**

**Aspirations and Academic executions which had never stopped came to a standstill due to the hit back of 2nd wave.**

We, as doctors and world citizens, were going through the toughest of the times by working and taking care of our responsibilities towards our patients and families, mostly in that order too, when suddenly the whole of humanity was catapulted into the conundrum of Covid-19. The health care workers, that is, us, were at the centre of the often life and death situations of such proportions, as we had

only heard of and not encountered before. Just having taken care of the first wave of this baffling virus, we were thrown, head first, into the second wave, which turned out to be more serious, more confounding and it snatched lives faster than we could try and save them. Then started the blame game, and the people, in their ignorance, tinged with grief and anger turned their ire upon the health care community, inciting many a brutal attack against the very people who had forgotten eating and sleeping in order to take care of the sick and suffering, oblivious to their own health, separated from their families for long periods to protect them from exposure to the deadly virus.

Since this calamity of almost epic proportions has hit the world and our country, the IMA has been standing like a rock- giving its expert opinions on the way forward, guiding the doctors in the management of covid19 and last but not the least, standing by the doctor community against all the injustice against them, encouraging them from time to time for their exemplary work, helping out the bereaved

families in these tough times and making sure that the hard work and sacrifices of the doctors community is never forgotten. As part of the team IMA- KSB, I have watched and participated with the office bearers and members alike, spent sleepless nights trying to find solutions to problems faced by the patients or the doctors.

This pandemic witnessed the loss of Padmashree awardee and former national president of the Indian Medical Association Dr. K.K. Aggarwal who passed away after battling Covid-19 for several days at New Delhi's All India Institute of Medical Sciences. A cardiologist by profession, he was also the head of the Heart Care Foundation of India. He also received the Dr. B.C. Roy Award in 2005 and Padmashree in 2010. We pledge that "his spirit of spreading positivity in the direst of circumstances must be kept alive in each one of us. Let us remember him for his work and indomitable spirit."

### **IMA OBSERVED – “SAVE THE SAVIOURS” on 18th JUNE 2021**

Healthcare workers are susceptible to reactive violence from patients and their attendants, affecting their mental and physical well-being. While on one hand we applaud the healthcare professionals for their heroics on a daily basis, there exists violence against healthcare workers (HCWs) in various forms among all cadres and at different levels of care.

Despite all these struggles, healthcare workers are dedicated and resilient individuals who continue to care for people. Seeing all this, it's felt that it is essential for hospitals to have policies and protocols established to deal with violent episodes at their facilities. Policies and protocols should promote peaceful resolutions to violent situations. To be effective, training and policies should not just be focused on the hospital security team but also on clinicians and other frontline employees.

.....The unpredictable Tsunami is waiting-THE THIRD WAVE

The third wave may be around the corner. As people administrations are gearing up for it, the IMA stands with our government and our doctors to make all efforts possible to mitigate the effects of this virus.

After all, Tough times don't last, Tough and resilient people do. The need of the hour is for us to stand together, think sanely and sensibly and smoothly and safely steer the country and the mankind out of this crisis.

We are saddened by tragic loss of lives of our members, their family members and countrymen. They are in our prayers and may God bless their souls!

**Long live IMA**

**Jai Hind**

**Jai Karnataka**

# SECRETARY'S MESSAGE

**Dr. S.M. PRASAD**

**Dear Esteemed IMA members & Seniors,**

*Greetings from IMA KSB.*

***Wish you all Happy Doctor's day-2021.***

First of all, heartiest congratulations for participating in the protest against the violence on doctors. Though all members could not participate physically, the long awaited movement & protest kick started the way in which every-one was alerted to get protected against the violences in our establishments. This movement is not just for one day and has to be addressed henceforth.

When we think of the violences happening on doctors over many years, so many thoughts come to mind, are we able to face the violence?. In case of attack in the establishment or outside, by what means doctors should get protected?. Can security personnel or police protect us during the violence? As doctors, we need to move with some caution henceforth, as we are the soft targets by many. Are we or

medical personnel with us forgetting the effective communication to patients and their attenders especially in ICU's and Covid Care? Whether the institutions (teaching / profitable / non-profitable / charity) are having reasonably 24X7 maintained equipments, security system, secured triage area and ICU's? Are the Covid warriors inside the covid ICU and emergencies have health insurance (in case of becoming Covid Positive)?. Reimbursement of medicines, sufficient remunerations, Life insurance, etc. also to be addressed.

All of you agree that we need to think regarding the above issues and suggest our young doctors as well as the institutions. It is also a big idea of improving our communication skills, self defence skills etc. Even if there is a hint of violence in risk areas of hospital, they should be cordoned off from visitors. Doctor-doctor, doctor-nurse, doctor-patient relationships and hospital to hospital referral etiquette should be

strictly followed, to further avoid violences.

Very importantly, we need to maintain cordial relationships with doctors and paramedical personnel in our areas of practice. Police stations in our jurisdiction, social workers who are all our friends in need for us.

I request all our IMA members to

inform all the doctors (senior and junior doctors) within your reach and friends circle who are not members to become IMA members to increase the strength of the IMA branches in Karnataka. All of you know that there are many effective schemes available in IMA KSB and IMA Hqrs, once they get the membership number from IMA.

**Jai Hind**

**Jai Karnataka**

**Jai IMA**
