Editorial

From the Desk of
Prof. Dr. S.M. Prasad

!! Greetings from IMA Focus Editorial board !!

Great to observe & see the new team under President Dr V V Chiniwalar, Hon State Secretary Dr Suriraju, Hon Treasurer Dr Shankaranarayan and all office bearers of team of 2024-25 has assumed the office on 01-11-2024 to move in lightning speed to achieve further goals and objective of our IMA.

Time has come for all of us to be more competitive especially in cities. Every one of us need to more communicative, need to follow doctor patient relationship, more patience in intensive care units and Emergency rooms, etc to satisfy many needs of our patients. We teach CPR but no CPR trained personnel, No AED racks in any of the common areas of public places like educational institution including medical colleges & hospital corridors, auditoriums, railway stations, etc. Swimming pools are there in many of the high end apartments or schools without any of the requirements used in CPR or ACLS for the needy. We talk on stage but not effective practically in the field. Tie has come to monitor and bring them into the field effectively.

Tips for better doctor patient relationship:

Trust : Trust is a fundamental aspect of the relationship. When patients trust their doctor, they're more likely to share information that helps the doctor provide better care.

Ethics : Doctors are expected to act in their patients' interests, even when it conflicts with their own. They should treat patients with respect, deal honestly with them, and not reveal confidences unless the well-being of others is threatened.

Law : The common law recognizes the power imbalance between the doctor and patient and imposes non-negotiable duties on the doctor.

Patient-centered care : Healthcare has become more patient-centered in recent times.

Decision making : There are different models for decision making, such as an informative model where the patient makes decisions independently, or a paternalistic model where the doctor makes decisions based on their judgment.

Request all of life members of IMA to continue to follow "EACH ONE BRING ONE". Encourage your friends to become members and their family allopathy medicine members to become IMA life member. Out of 1 lakh 40 thousand medical degree holders in Karnataka, we have not reached even 25% of the allopathy doctor population to become IMA life members. Should anyone in public life look this as lack of unity among doctors, doctors doesn't help each other, doesn't like social life or anything else can be assumed by them. By becoming the life member and there on to many useful scheme bt IMA Karnataka, an allopathy doctor become more protected himself and the family members by enrolling into KSSS- old & new scheme, KPPS, & KSHS.

Secretary's Message

Dr. Suriraju V.

In the first month following my appointment as honorary state secretary, I have embarked on a journey to thoroughly acquaint myself with the roles and responsibilities inherent in this significant position. I am privileged to collaborate with an exceptional team under the esteemed presidency of Dr V V Chiniwalar. This initial phase has underscored the gratifying nature of addressing the challenges faced by doctors and IMA.

During this period, I have had the invaluable opportunity to visit IMA branches in Hoskote, KGF, Bangalore and IMA north. At each location, I was inspired by the dedication and resilience of the doctors, whose stories of commitment to their patients and the profession were truly motivating. These experiences have reinforced my belief in the immense potential for the IMA's expansion and the critical importance of initiatives such as membership drives.

One of the pressing concerns that underscore the necessity of a strong IMA is the increasing violence against medical professionals. A unified and robust IMA can empower doctors to advocate effectively for themselves, drawing greater attention from the government. This can contribute significantly to discouraging aggressive acts against medical practitioners, ensuring their safety and dignity.

To achieve this, it is imperative that we build a robust organization. Social responsibility is a fundamental duty for medical professionals, and we have initiated directives for all IMA branches to reflect this commitment. The strength of the IMA Karnataka State Branch lies in its subcommittees. By ensuring that each subcommittee comprehends its responsibilities and executes them efficiently, the IMA can engage more doctors and foster enthusiasm through the powerful medium of word-of-mouth communication.

Let us collaborate to enhance the capabilities of IMA branches. Our collective vision is to establish a harmonious understanding with the government. It is essential to make clinics and hospitals compliant and welcoming, particularly in terms of the Karnataka Private Medical Establishments Act (KPMEA), trade licenses, and related regulations. By doing so, we can create a more conducive environment for both medical professionals and patients alike.

my initial month as Hon. secretary has been both enlightening and inspiring. I am committed to working tirelessly alongside our team to realize the full potential of the IMA. Together, let us strive to create a safer, more supportive, and vibrant medical community that serves not only its members but also the broader society.

Jai Hind!

Jai Karnataka!

Long live IMA!
